

WEEK 2

Master The Command Line

Take control of your computer

You can talk to your computer using **commands**

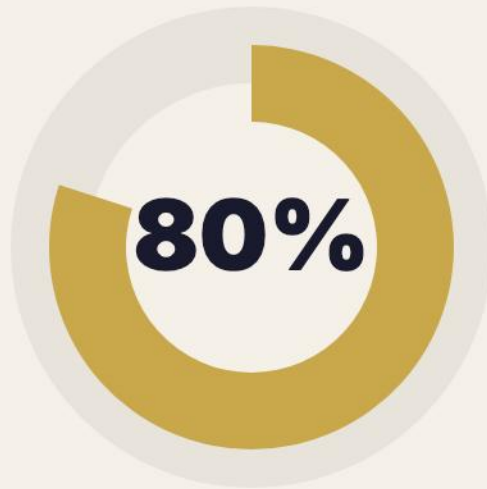

The **command line** lets you type instructions instead of clicking

Three steps. One pipeline. Done.

Use **cd** to move into a different folder

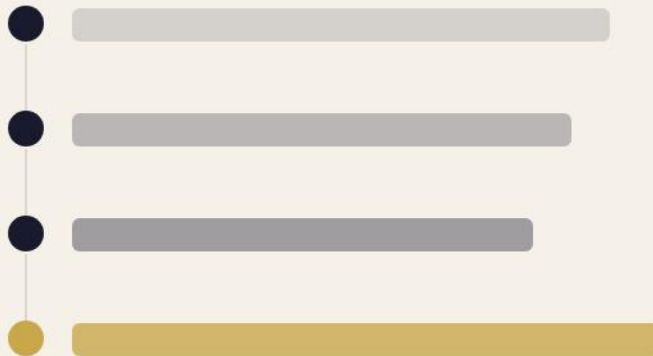

Is lists everything in the folder you're in

3 outputs. 0 manual work. Every Monday.

mkdir makes a new folder for you

Follow for more coding tips

Real posts on building with AI.
New every Monday.
