

WEEK 16

Coding Made Easy

Install Packages Like A Pro

You can use packages to build projects faster

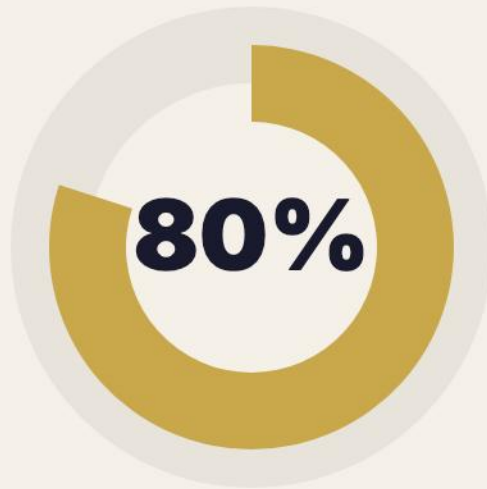

Create a **toolbox** for each project with virtual environments

Three steps. One pipeline. Done.

Install **qrcode** package to generate QR codes

Use **pip** to install packages into your toolbox

3 outputs. 0 manual work. Every Monday.

Keep your projects organized with **separate** toolboxes

Built once. Still running.

Follow for more coding tips and tricks

Real posts on building with AI.
New every Monday.
