

WEEK 22

Keep Your Secrets Safe

Learn about environment variables

You store sensitive info in a special file

This file is called a .env file

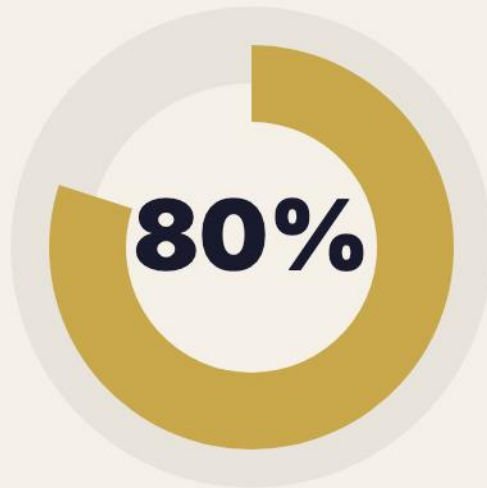

Three steps. One pipeline. Done.

Add `.env` to `.gitignore` so it never reaches GitHub

3 outputs. 0 manual work. Every Monday.

You can load the **.env file** in your code

Using environment variables is a best practice

THE LEARNING CURVE

Small steps. Compounding return.

Follow to learn more about coding

Real posts on building with AI.
New every Monday.
