

401 Error > Transcript Success

Learn the quick fix for YouTube API hiccups.

Step 1 - Get the API key

Sign in to Google Cloud, create a project > enable YouTube Data API > copy the key.

Step 2 - Call the API

Use curl or Postman > send GET to

<https://youtube.googleapis.com/youtube/v3/captions?videoId=XYZ&key=YOURKEY>.

Step 3 - Feed to Claude

Pass the transcript text as input > ask for a 200?word summary > get the output instantly.

Step 4 - Add user accounts

Create a sign?up page > store email and password securely > track transcript count per user.

Step 5 - Fix the newsletter

Re?build the scheduler > test with a test list > schedule Monday sends.

Follow for more hands?on builds from Malaysia.
